

## hEX lite

The hEX lite is a small five port ethernet router in a nice plastic case.

Not only this is an attractive looking tiny SOHO unit, its price is lower than the RouterOS license alone - there simply is no choice when it comes to managing your wired home network, the hEX lite has it all.

It's probably the most affordable MPLS capable router on the market! No more compromise between price and features - hEX lite has both. With its compact design and clean looks, it will fit perfectly into any SOHO environment.
